

# INTEGRATED COMPUTER AIDED DISPATCH & MAPPING SOLUTION

**Ryzyliant CAD Classic™** is an innovative, easy-to-use, multi-agency Computer Aided Dispatch (CAD) and Mapping solution for smaller, more rural Sheriff, Police, Fire, and EMS agencies. Built with Microsoft®.NET and SQL Server technology and packaged with Ryzyliant's Dual Appliance architecture, CAD Classic simplifies the emergency response reporting process. With Ryzyliant CAD Classic and its robust line of integrated products, communications professionals can smoothly perform multiple tasks with one high-performance system at an affordable price point.

## Dispatch...Simplified

Backed by 17 years of development experience in CAD and mapping, Ryzyliant meets the demanding needs of rural PSAPs, law enforcement, Fire/EMS personnel, and other public safety professionals. Like every component of the Ryzyliant solution suite, our CAD product was developed to be easy to use, learn, and support.

## Build, Maintain, and Display Mapping Data Your Way

**Ryzyliant EDGE Mapping™** seamlessly integrates with CAD Classic and 3rd party 9-1-1 systems, providing precise caller location and event management. EDGE Mapping dramatically increases location accuracy and reduces response times by delivering enhanced geospatial data and situational awareness. Ryzyliant EDGE Mapping provides a reliable suite of tools with easy-to-use technology to build, maintain and display local mapping data your way.

Rzyliant MapBuilder™ is one of the industry's most advanced authoring environments for creating location-centric data to assist counties with their 9-1-1 response. With Rzyliant MapBuilder, users can design and author fully interactive content, rich with occupant details, and location descriptions, with the most up-to-date information for current and specific content.

## Browser Access

Rzyliant CADView™ allows administrators and first responders using laptops and tablets to easily track current calls, events, and statuses of units and personnel from anywhere via a standard browser. With Rzyliant CADView, users can see all open calls for service, check the status of active units, see the location of calls on the map, and retrieve call times.

## Service Features and Benefits

At Rzyliant, we believe every emergency dispatch agency and PSAP, regardless of size or budget, should expect more from their technology provider. Our mission is to reduce emergency response technology complexity and cost, focusing solely on the features and functionality that matter most by addressing each product, whether it's building and editing maps, addressing counties for 9-1-1 service, or designing easy-to-use CAD and mapping products. By eliminating feature creep and bloat-of-legacy systems, we can create and offer simple yet incredibly efficient and cost-effective solutions.

Example of CAD Classic Screen

- Multi-Agency
- Integrated EDGE Mapping
- Integrated Communications & Notifications by Text and Email
- Supports AVL
- Standard Reporting
- Configurable Screen Module Layouts
- Map Building and Editing Capability
- MobileCAD - Silent Dispatch
- Optional NG9-1-1 / Optional Radio Console
- 7x24x365 HelpDesk / Technical Support
- Installation and Setup
- Map Creation and Maintenance Service
- Application Support / Hardware Support / Software Warranty
- Total Cost of Ownership Advantage
- License Transfer to the EDGE CAD and 9-1-1 Platform when available
